

Nr.1 Berechne Umfang und Flächeninhalt der folgenden Flächen. b) c) 2cm

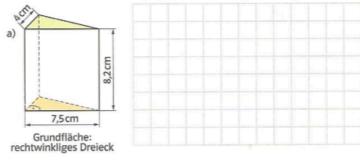

Nr.2

Berechne jeweils das Volumen des Prismas.

1. Flächeninhalt G der Grundfläche:

$$G = \frac{g \cdot h}{2}$$

$$G = \frac{8 \text{ cm} \cdot 4 \text{ cm}}{2}$$

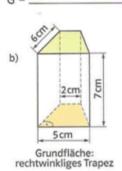

$$G = 16 \text{ cm}^2$$

2. Volumen V des Prismas:

$$V = G \cdot h_k$$

$$V = 16 \text{ cm}^2 \cdot 6 \text{ cm}$$

$$V = 96 \text{ cm}^3$$

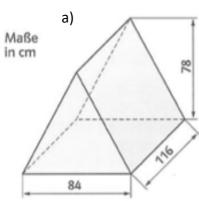

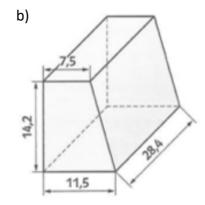

G = ______ V = _____

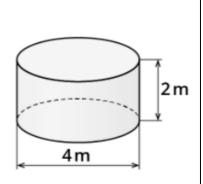

c)

Nr. 3

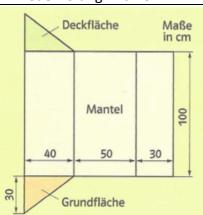

Berechne das Volumen der Prismen und des Zylinders.

Nr.4

1. Flächeninhalt G der Grundfläche:

$$G = \frac{g \cdot h}{2}$$

$$G = \frac{40 \text{ cm} \cdot 30 \text{ cm}}{2}$$

$$G = 600 \text{ cm}^2$$

2. Flächeninhalt M des Mantels:

$$M = u \cdot h_k$$

$$M = (40 \text{ cm} + 30 \text{ cm} + 50 \text{ cm}) \cdot 100 \text{ cm}$$

$$M = 120 \text{ cm} \cdot 100 \text{ cm}$$

$$M = 12000 \text{ cm}^2$$

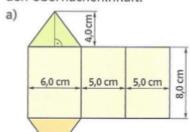

3. Oberflächeninhalt O des Prismas:

$$0 = 2 \cdot G + M$$

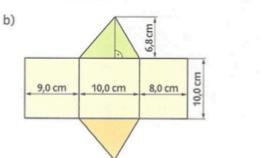

$$0 = 2 \cdot 600 \text{ cm}^2 + 12000 \text{ cm}^2$$

$$0 = 13200 \text{ cm}^2$$

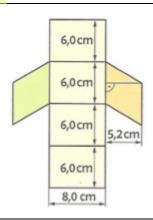

1 Die Abbildung zeigt das Netz eines Prismas. Berechne den Oberflächeninhalt.

G =			
(7 =			

Berechne die Oberfläche des Prismas. Nr.5

Berechne Oberfläche und Volumen der verschiedenen Prismen. Nr.6

a)
